

Participatory Frameworks for Facilitating Interdisciplinary Research in Rice Pest Management

M.M. Escalada

Visayas State College of Agriculture
Baybay, Leyte, Philippines

&

K.L. Heong

International Rice Research Institute
Los Banos, Laguna, Philippines

Contents

Foreword by R Wang DDG-R

Preface by authors

Acknowledgements

Chapter 1. Pest Management and Participation

- 1.1 Introduction
- 1.2 The Rice IPMNetwork
- 1.3 Paradigm Shifts and New Opportunities

Chapter 2. Participatory Planning

- 2.1 Concept of Participation
- 2.2 The Diagnostic Approach
 - Facilitated workshops
 - Management of Change

Chapter 3. General Workshop Techniques

- Introduction
- Pre workshop preparations
- Social activities
- Card and chart technique
- Farm visit exercise
- Participatory Peer reviews

Chapter 4. Problem Analysis Techniques

- Introduction
- Flowcharting

- Time Profiles
 - Seasonal profiles
 - Historical profiles
- Discrimination analysis
- Field Force Analysis
- Cause-and-effect Analysis
- Matrices
 - Damage matrix
 - Interaction matrices

Chapter 5. Decision Analysis Techniques

- Introduction
- Behavioral decision theory
- Decision trees
- Rule based advisory matrix
- Policy options analysis
- Ethnoscience techniques
 - Folk taxonomy
 - Emic-etic framework

Chapter 6. Farmer Survey Techniques

- Introduction
- Focus Group Discussions
- How to conduct farmer surveys

Chapter 7. Project Planning Techniques

- Introduction
- Impact planning framework
- Gantt Charts
- Participatory Budget Planning

Chapter 8. Communication Techniques

- Introduction
- Farmer participatory research
- Participatory exercise for motivating change in cognition and decisions
- Strategic extension campaigns

References

Appendices

- Rice IPMNetwork Steering Committee 1997-2000
- “Win-win” paradigms of human interactions
- Brainstorming
- Quality Control Circles
